Languages: Spanish(Native), English(Intermediate).

EXPERIENCE

University — *Page E-commerce* (Otc 2023 - Dec 2023)

- Developed using PHP with Laravel
- Integrated MercadoPago for payment processing
- Implemented order tracking features
- Managed database using HeidiSQL
- Enabled order management and search functionalities by categories, keywords, and price

University — *App-movil* (Mar 2024 - June 2024)

- Built mobile app using Flutter with Dart
- Implemented AI for detecting original or copied gadgets using SickLearn
- Designed and developed N-layer architecture
- Ensured authentication security
- Utilized AWS services: RDS, Lambda, API Gateway, Polly
- Developed backend APIs in Python on AWS for efficient data processing.

NetDreams—*Developer* (Apr 2024 – Apr 2025)

- Maintained and enhanced BIM backend systems using Python.
- Developed frontend projects including Sudoku, Press Kit, Flappy Rocks, La Tradi, Inka Aventura, Custom Plantillas.
- Created automation scripts for warehouse management using Python
- Developed APIs with PHP for video game database integration
- Edited and maintained a webpage using Astro.
- Fully developed NTmetrics, working on database, backend, frontend, and testing.

University—*Personal Project* (Feb 2025 – Aug 2025)

- Frontend: Developed using ASP.NET MVC (C#).
- Backend: Architected with Models, Controllers, Services, and DTOs.
- AI-powered recommendation system built with Python & Scikit-Learn.
- Database: SQL Server.
- Full ownership of system architecture, implementation, and optimization.

UPT Incubadora Aruntakana— *IT Support & Laravel Developer* (Aug 2025 - Present)

- Providing technical support and process automation within the UPT Business Incubator.
- Developing and maintaining Laravel-based systems to optimize internal workflows.
- Creating Python scripts for data processing and operational efficiency improvements.
- Supporting events, systems, and digital infrastructure across incubation programs.

CareGuard— *Tech Lead* (Oct 2025 - Present)

- Leading the full-stack architecture and development of CareGuard, a web-mobile system for caregiving services.
- Managing NestJS backend, Flutter mobile app, and PostgreSQL database integration.
- Overseeing all technical operations, including deployment, versioning, and API design.
- Guiding a multidisciplinary team to deliver scalable, secure, and high-performance software.

EDUCATION

Software Engineering — *UPT(Private University of Tacna)*

AWS Cloud Practitioner — *Platzi*

Python Expert – *Platzi*

Desarrollo Backend con Go – *Platzi*
